

# Mobile Atomiser

## Technical Information Sheet - Mobile Unit

### Mobile Unit Description

If you have an odour or dust issue on site (eg: Landfill) where power or water are not readily available. The Mobile Unit can solve your problem.

The Mobile can be quickly towed to the required location, is fully self sufficient with its own water and power supply and can handle any terrain.

When used with AiroNaut™ odour control agent or ProSorb Atmospheric cleanser you have a powerful and effective combination for odour or dust control.

### Applications

- Landfill Sites
- Composting Plants
- Sewage Treatment Works
- Quarries
- Foundries
- Any industry producing dust/odour
- Emergency use

### Main Advantages

- Never blocks - no need for filters
- Uses less water than nozzle systems
- Low maintenance
- Greater coverage
- Totally Portable
- Can handle any terrain
- Uniformed droplets reducing the risks from Legionella

### Features

- Power input 110v &/or Petrol generator
- 1000 litre water bowser (24hr use)
- Atomiser speed 2000 – 11000 rpm
- Eye or ball hitch available
